DIRECTIONS

Place the number word cards between 2 players. Roll a die to see who will go first. (higher number begins) Player 1 draws a word card and scans the QR code. Player reads the word. If the word is read correctly, the player may keep the card. If the player cannot read the word, he/she must place the card on the bottom of the pile. It is now Player 2's turn to draw a word card and try to read the word. Players alternate turns until all cards have been drawn and read. The players will then count their word cards. The player with the most cards is the winner.
